

**Characteristic of projects and activities:**

Following the great day of turn off the light or Earth Hour Day worldwide event scheduled in the final Saturday of March, FEED, in cooperation and collaboration with Environmental office of Bangkok Metropolitan Administration and business companies, continues to keep smart energy activities by running a “low Carbon School Network” project targeting 16 secondary schools in Bangkok 6 districts started from March 2012 – March 2013. In 2013 BKK has set the budget to support other 50 schools to join the project’s activities in March 2013 to March 2014. This project is also opened for other sponsor and supporters to join in and put forward their efforts, technique, low carbon idea and so on to targeted schoolchildren.

**Project’s areas:** Target secondary schools country wide

Activity for example:

- Project grand opening
- Pre test of participate schools
- Group seminar
- Smart energy youth camp
- Following of behavior change in schools
- Explore to family of children

**Duration:** March 2013 – March 2014 (2556-2557)

**Budget (Baht):** 250,000 baht /school (One province one school, countrywide)

**Note for Supporters and partners:** Management and staff can join the project’s activities and learn how to change their own behaviors to be friendly and harmony with nature. Activities of the project@school can benefit the supporter’s participants and Branding as follow;

- Tree planting event with school and community around
