

**Characteristic of projects and activities:**

Chitralada school is opened for FEED as the first environmental educator team to perform the green action in school called “Love tree Day” following that schoolchildren were sent to join nature education program at Bangpu nature Education centre. Then FEED team has been asked to develop Environmental curriculum and set up the teacher team to take the daily classroom teaching. The environmental curriculum developed by FEED will be used as a teaching program integrated into curriculum appropriated at Chitralada primary school, until it completed the final development.

**Project’s areas:** Chitralada School, Dusit Palace, Bangkok

**Duration:** 2 years (2013-2015)

**Budget (Baht):** 1,270,000 Baht/year

- Curriculum development
- Traveling cost for teacher team
- Natural classroom development
- Nature trails development
- Nature interpretation sign boards development

**Note for Supporters and partners:**
